CLARA

CLARA is a type family created for printing *A Dictionary of Editing* (2015) and now made generally available. The fonts are in OpenType format. The family includes *italic*, **bold**, *bold italic*, and SMALL CAPITALS, while the character set includes Greek, Cyrillic, ogham, phonetic and mathematical ranges, scribal abbreviations, and other specialist characters. The fonts also include some OpenType layout features (such as ligature substitution, small capitals, and old-style numerals), as well as some variant forms for particular languages. I will be happy to add suitable additional characters on request.

AMONGST the several mechanic Arts that have engaged my attention, there is no one which I have pursued with so much steadiness and pleasure, as that of Letter-Founding. Having been an early admirer of the beauty of Letters, I became insensibly desirous of contributing to the perfection of them. I formed to my self ideas of greater accuracy than had yet appeared, and have endeavoured to produce a Sett of Types according to what I conceived to be their true proportion. [John Baskerville]
